

Markdown Printing Guide

Quick Start in 4 Easy Steps

1. **Visit URL:** Go to <https://print.markdown.abctool.info/>
2. **Import MD File:** Click "Import MD" or drag and drop your `.md` file into the page
3. **Click Print:** Click the "Print / PDF" button in the toolbar
4. **Complete Printing:** Send to your printer or save as PDF

Print Markdown documents to physical paper or export as crisp PDF with **math formulas**, **Mermaid diagrams**, and **syntax highlighting**.

Mathematical Formulas (LaTeX)

Mass-energy equivalence: $E = mc^2$, Euler's formula:

$$e^{i\pi} + 1 = 0$$

Mermaid Flowchart

Code Syntax Highlighting

```
1  const toolName = 'Markdown Print Tool'; // Tool name definition
2  const printDoc = (name) => `Printing document: ${name}...`;
3  console.log(printDoc(toolName)); // Output execution result
```

Formatted Table & Task Checklist

Feature	Supported Formats	Key Advantages
Document Import	.md / .zip	Auto-resolves relative image paths; supports Typora & Obsidian packages
Print Layout	Standard A4 / Landscape	Smart anti-page-splitting for code blocks and tables

- ✔ Supports direct drag-and-drop of .md or .zip files
- ✔ Click "Print Document" to print or export PDF
